SUMMARY

Full-stack developer and Systems Analyst focused on TypeScript and the Next.js ecosystem. I work end-to-end: from gathering requirements with business teams to the data model, the type-safe backend and the interface. I designed and shipped a complete ERP to production, including electronic invoicing integrated with the Argentine tax authority. I previously worked in finance, treasury and sales at the same company. Looking to join a product team to grow in architecture, testing and engineering practices.

EXPERIENCE

Full-Stack Developer

Cambren SRL | April 2026 — Present

- Designed and built end-to-end the ERP that now runs the company's operations: 6 modules over a relational model of **121 entities** and 55 tRPC routers. First version **in production in 3 months**; currently used by ~10 people across 4 departments plus management.
- Integrated **electronic invoicing with ARCA** (Argentina's tax authority) end-to-end — taxpayer registry lookups, invoice issuance and typed handling of tax errors — removing manual invoice entry entirely.
- Implemented access control from a catalog of **114 granular permissions** as the single source of truth, enforced at both the tRPC procedure and UI layers, with NextAuth v5.
- Added an **internal AI assistant** (Vercel AI SDK + Claude) with tool-calling over the system's data, so management can query the business in natural language.
- End-to-end type-safe backend with tRPC, Prisma and Zod; UI with React 19, Tailwind CSS 4 and shadcn/ui; unit tests with Vitest covering the business-critical logic (costing, unit splitting and invoice calculation). Continuous deployment on Vercel.

Finance and Treasury Analyst

Cambren SRL | January — April 2026

- Ran payroll for **over 30 employees** and managed supplier payments, invoice reconciliation and daily cash flow, coordinating regulatory compliance and electronic invoicing with the accounting firm.

E-commerce and Customer Support Lead

Cambren SRL | May 2025 — January 2026

- Launched the company's online store on Tiendanube (Latin American e-commerce platform) — catalog, payment methods, shipping and after-sales — and was the top revenue generator on the sales team.

Chatbot Developer

Cambren SRL | July — November 2024

- Modeled the interaction with UML activity diagrams and implemented a chatbot that automated the most frequent customer inquiries.

EDUCATION AND CERTIFICATIONS

Systems Analyst: Universidad del Salvador, Buenos Aires — 2023 to 2026 (completed)

B.Sc. in Computer Engineering: Universidad del Salvador, Buenos Aires — 2023 to 2027 (in progress)

Certification: Google Cybersecurity (SIEM, vulnerability analysis, regulatory compliance)

Languages: Spanish (native) · English (advanced) · Italian (beginner)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C#, C, SQL, HTML, CSS

Frontend: Next.js 16, React 19, Tailwind CSS 4, shadcn/ui, TanStack Query / Table, React Hook Form, Zustand

Backend and data: Node.js, tRPC, Prisma ORM, Zod, NextAuth v5, PostgreSQL, MySQL, Hibernate / HQL, REST, SOAP

AI, testing and tooling: Vercel AI SDK, Claude API, Vitest, Testing Library, ESLint, Git, GitHub, Vercel, Linux, UML

Integrations: ARCA e-invoicing, Tiendanube, Google Sheets API, Vercel Blob, ExcelJS
